B.E. Information Technology (2025) | MVSR Engineering College, Hyderabad | **Based in Hyderabad — open to remote roles across India**

PROFESSIONAL SUMMARY

B.E. Information Technology graduate with hands-on experience building **user-facing web features, REST API integrations, and full-stack applications** using **React, JavaScript, Django, Flask, and Python**. Delivered responsive front-end work during an internship at RCI; built production-style API-driven workflows at CloudSire Solutions. Comfortable collaborating with backend teams, consuming REST APIs, and iterating on UI based on feedback. Seeking a **Frontend Engineer** role at VectorShift where I can grow React/Next.js skills while contributing to an intuitive, performant AI workflow platform.

EDUCATION

Degree	Specialization	Institute	Year	CPI
B.E.	Information Technology	MVSR Engineering College	2021–2025	7.42
Intermediate	Physics, Chemistry & Mathematics	Sri Chaitanya College	2019–2021	9.45
SSC	—	Sri Chaitanya School	2019	8.8

EXPERIENCE

Front-end Engineer Intern — RCI | 2023

- Built user-facing web application features using **Django templates, HTML5, CSS, Bootstrap, and JavaScript**; implemented responsive layouts and form-driven workflows for end users.
- Collaborated with backend developers on requirements, API contracts, and issue triage; delivered iterative UI fixes based on stakeholder feedback.
- Applied component-oriented thinking and maintainable markup patterns across web modules.

Integration Engineer Intern — CloudSire Solutions LLP | Nov 2023 – May 2024

- Developed **REST API** integrations connecting Salesforce, Jira, Mailchimp, ServiceNow, Slack, and Outlook — experience directly relevant to consuming and coordinating backend services from application layers.
- Automated data extraction, transformation, and import pipelines; used **Git** for version control and iterative delivery with cross-functional stakeholders.
- Translated business requirements into reliable integration logic; debugged end-to-end data flows across distributed systems.

SDE Intern — Samyama.ai | Nov 2025 – Jan 2026

- Built backend services in **Python** with **FastAPI**-style structured JSON APIs; collaborated across the stack on model pipeline workflows.
- Validated a **35,506-record** dataset with schema compliance checks; evaluated latency vs. cost trade-offs for production-oriented decisions.

Founder's Office Intern — Poditivity Connect | Oct 2024 – Mar 2025

- Worked in an **early-stage startup** environment; coordinated cross-functional teams and communicated product insights through leadership-facing reports.
- Supported iterative product decisions — experience relevant to fast-moving startup UI iteration cycles.

PROJECTS

Bridging Learning Gaps: Web App for Deaf and Mute Students in Tamil (Major Project)

- Built a full-stack web application with **Flask** REST endpoints, a browser-based UI, live video processing, and a CNN-LSTM inference pipeline; achieved **93.7% accuracy**.
- Owned the end-to-end flow from frontend interaction → API calls → backend processing → results display.

React & JavaScript Web Applications (Academic / Personal)

- Built interactive UIs with **React** and modern JavaScript (component state, props, hooks); applied responsive CSS patterns for multi-device layouts.
- Consumed REST APIs from frontend components; practiced separation of concerns between UI and data-fetching layers.

CERTIFICATIONS

- Complete A.I. & Machine Learning and Data Science Bootcamp** — Andrei Neagoie & Daniel Bourke
- 2nd Prize**, Project Expo 2025 — *Bridging Learning Gaps* (RDC & IIC, MVSREC)

TECHNICAL SKILLS

Frontend: React, JavaScript (ES6+), HTML5, CSS, Bootstrap, responsive design

Web & Frameworks: Django, Flask, Next.js (learning), REST API consumption

Languages: Python, Java, SQL, C

Backend (collaboration): FastAPI, JSON APIs, microservices-oriented integration

Tools: Git, Postman, Jupyter Notebook

Concepts: Component-based UI, API-driven architecture, iterative UI development, cross-functional collaboration
