B.E. Information Technology (2025) | MVSR Engineering College, Hyderabad | **Based in Hyderabad, India — open to fully remote global roles**

PROFESSIONAL SUMMARY

B.E. Information Technology graduate with hands-on experience building **Python applications, REST APIs, data pipelines, and full-stack web systems**. Built production-oriented backend services at Samyama.ai; automated multi-system data integrations at CloudSire Solutions; delivered user-facing web features at RCI. Comfortable with **Git**, Linux-based development, SQL databases, and iterating independently in async remote environments. Seeking a **Junior Software Engineer** role at MixRank where I can grow as a generalist engineer working on data-intensive systems at scale.

EDUCATION

Degree	Specialization	Institute	Year	CPI
B.E.	Information Technology	MVSR Engineering College	2021–2025	7.42
Intermediate	Physics, Chemistry & Mathematics	Sri Chaitanya College	2019–2021	9.45
SSC	—	Sri Chaitanya School	2019	8.8

EXPERIENCE

SDE Intern — Samyama.ai | Nov 2025 – Jan 2026

- Built backend services in **Python** with structured JSON APIs (FastAPI-style); contributed to LLM pipeline workflows and model integration.
- Validated a **35,506-record** dataset with schema compliance checks; evaluated latency vs. cost trade-offs for production-oriented decisions.
- Worked across data processing and API layers in a small, fast-moving engineering team.

Integration Engineer Intern — CloudSire Solutions LLP | Nov 2023 – May 2024

- Developed **REST API** integrations connecting Salesforce, Jira, Mailchimp, ServiceNow, Slack, and Outlook — building reliable data extraction, transformation, and import pipelines.
- Automated ETL-style workflows across distributed systems; used **Git** for version control and iterative delivery with cross-functional stakeholders.
- Debugged end-to-end data flows and translated business requirements into integration logic.

Front-end Engineer Intern — RCI | 2023

- Built user-facing web application features using **Django**, HTML5, CSS, Bootstrap, and **JavaScript**; implemented responsive layouts and form-driven workflows.
- Collaborated with backend developers on requirements, API contracts, and issue triage.

Founder's Office Intern — Poditivity Connect | Oct 2024 – Mar 2025

- Worked in an **early-stage startup** environment; coordinated cross-functional teams and communicated product insights through leadership-facing reports.
- Operated independently in a remote, async workflow with minimal supervision.

PROJECTS

Bridging Learning Gaps: Web App for Deaf and Mute Students in Tamil (Major Project)

- Built a full-stack web application with **Flask** REST endpoints, browser UI, live video processing, and a CNN-LSTM inference pipeline; achieved **93.7% accuracy**.
- Owned end-to-end flow: data ingestion → model inference → API → user-facing results.

React & JavaScript Web Applications (Academic / Personal)

- Built interactive UIs with **React** and modern JavaScript; consumed REST APIs from frontend components.
- Explored component architecture, state management, and responsive CSS independently outside coursework requirements.

CERTIFICATIONS

- Complete A.I. & Machine Learning and Data Science Bootcamp** — Andrei Neagoie & Daniel Bourke
- 2nd Prize**, Project Expo 2025 — *Bridging Learning Gaps* (RDC & IIC, MVSREC)

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, C
Web & Frameworks: Flask, Django, React, REST APIs

Data & ML: Data pipelines, ETL-style integrations, CNN-LSTM models, LLM workflows

Databases: SQL (PostgreSQL — learning)

Tools: Git, Linux (development), Postman, Jupyter Notebook

Concepts: API-driven architecture, data validation, async remote collaboration, independent problem-solving
