Cover Letter: AI Specialist / AI Generalist

Xclusive Interiors Pune (Pimple Saudagar) 2026-08-22

I am applying for the AI Specialist / AI Generalist role at Xclusive Interiors. I enjoy researching modern AI tools, building practical automations, and solving real business problems — not just experimenting in isolation.

I am a Python and JavaScript engineer with internship experience across AI workflows, API integrations, and customer-facing delivery. At Samyama.ai I iterated on structured language-model outputs with JSON validation and evaluation loops. At CloudSire I built REST API automations across Salesforce, Jira, ServiceNow, and Slack from business requirements. At Poditivity I worked with founders and explained technical outcomes to non-technical stakeholders while leading a 14-person cross-functional team.

- **Built and tested structured LLM output workflows**, with JSON schema validation across 35,506 synthetic training examples at Samyama.ai.
- **Automated enterprise CRM and support integrations**, processing ~100 tickets weekly and cutting manual handoffs by 45% at CloudSire Solutions.
- **Delivered measurable growth outcomes with founders**, increasing engagement by 40% as General Manager at Poditivity Connect.
- **Built a real-time AI inference application**, achieving 93.7% accuracy with iterative experimentation (github.com/iamsankeerth/Major-Project).

This role asks for curiosity, independent experimentation, and the ability to connect AI tools to everyday business workflows. I would contribute by researching and implementing prompting and automation solutions, integrating APIs and webhooks reliably, troubleshooting issues quickly, and explaining outcomes clearly to non-technical teams. I am eager to deepen hands-on experience with tools like n8n, Make, and Supabase in a practical business setting. I am open to relocating to Pune for in-office work and available to start immediately.

I would welcome the opportunity to discuss how my AI workflow, integration, and communication experience can support Xclusive Interiors.
