

PROFESSIONAL SUMMARY

Final-year B.E. Information Technology student with hands-on experience in Python, SQL, machine learning, and generative AI. Fine-tuned a Small Language Model on a 35,000+ record dataset during an SDE internship; supported leadership decision-making through market research, trend analysis, and business-facing reports. Eager to apply analytical problem-solving and data-driven insights to analytics and risk management at American Express.

EDUCATION

Degree	Specialization	Institute	Year	CPI
B.E.	Information Technology	MVSR Engineering College	2021–2025	7.42
Intermediate	Physics, Chemistry & Mathematics	Sri Chaitanya College	2019–2021	9.45
SSC	—	Sri Chaitanya School	2019	8.8

EXPERIENCE

SDE Intern — Samyama.ai | Nov 2025 – Jan 2026

- Built and fine-tuned a domain-specific Small Language Model (SLM) in Python using Transformers, applying structured JSON outputs and evidence-based frameworks (CBT, Polyvagal Theory).
- Generated and processed a 35,506-record synthetic dataset for model training; performed data analysis and quality checks to ensure schema compliance and reliable downstream insights.
- Evaluated model performance trade-offs by comparing SLM vs. generic LLM architectures, reducing inference latency and operational cost.

Founder's Office Intern — Poditivity Connect | Oct 2024 – Mar 2025

- Conducted data analysis on market trends, competitive landscapes, and business opportunities; distilled insights to support strategic decision-making and business recommendations.
- Prepared analytical reports and presentations for senior leadership using Microsoft Excel and PowerPoint, translating trends and insights into actionable growth recommendations.
- Coordinated cross-functional teams to align on company initiatives and streamline information flow across departments.

Integration Engineer Intern — CloudSire Solutions LLP | Nov 2023 – May 2024

- Automated lead extraction from Salesforce based on defined criteria; transformed and imported records into Mailchimp to improve conversion workflows.
- Integrated Botsonic chatbot with Jira API for automated ticket creation; built real-time email-to-ticket pipelines across Outlook, ServiceNow, and Slack.

Head of Socials & Growth — Poditivity Connect | Dec 2024 – May 2025

- Analyzed engagement trends and applied data-informed insights to targeted digital campaigns; increased social media engagement by 40%.

PROJECTS

Bridging Learning Gaps: Web App for Deaf and Mute Students in Tamil (Major Project)

- Built a real-time Tamil Sign Language-to-text system using OpenCV, MediaPipe, and a CNN-LSTM model, achieving 93.7% accuracy; deployed via Flask with live gesture recognition and text/audio output.

MalFoyle: Python-Based Malicious File Detection System

- Developed an automated file analysis tool in Python with hash/signature scanning, Yara rule detection, and structured reporting via a Rich library interface.

CERTIFICATIONS

- Complete A.I. & Machine Learning and Data Science Bootcamp — Andrei Neagoie & Daniel Bourke
- 2nd Prize, Project Expo 2025 — Bridging Learning Gaps (RDC & IIC, MVSREC)

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Jupyter Notebook, FastAPI, Postman, Celigo, Digibee
Technologies: Machine Learning, Generative AI / LLMs (model fine-tuning), Data Science, Front-End Development
Generative AI Tools: ChatGPT, Microsoft Copilot, Google Gemini

Productivity: Microsoft Excel, Microsoft PowerPoint

Also familiar with: C, Java, React, Node.js, Bootstrap CSS
