Cover Letter: Member Technical

Broadridge Hyderabad August 23, 2026

Dear Hiring Manager,

I am applying for the Member Technical role in Hyderabad Hi-Tec City. As a B.E. Information Technology graduate (2025) based in Hyderabad, I am excited to contribute clean, maintainable front-end code on a collaborative engineering team.

My internships gave me hands-on experience building web interfaces, integrating REST APIs, and participating in the full software development lifecycle. At RCI, I developed user-facing features for a secure intranet platform with real-time chat and authentication flows using JavaScript, HTML, CSS, and Bootstrap. At CloudSire, I built reliable integrations across Jira, Salesforce, ServiceNow, and Slack while documenting workflows and debugging production issues. I have also built React and Next.js web applications with component-based architecture and API-backed features, and completed coursework in OOP, data structures, and relational databases with SQL.

- **At RCI, I delivered maintainable front-end features for a Django intranet platform with real-time chat and two-factor authentication**, improving internal collaboration across departments.
- **At CloudSire, I automated cross-platform ticket workflows processing ~100 tickets weekly**, reducing manual support handoffs by 45% through clean, documented integration code.
- **In my academic project Bridging Learning Gaps, I built a responsive Flask web interface for live inference**, earning 2nd prize at Project Expo 2025 with 93.7% model accuracy.

I bring a strong learning mindset, clear written communication, and eagerness to grow under senior engineers through code reviews, unit testing, and iterative delivery. I would welcome the opportunity to contribute to Broadridge's technology platforms from Hyderabad.

Sincerely,
Sankeerth Masetty
