

PROFESSIONAL SUMMARY

B.E. Information Technology graduate with hands-on software development experience across **Python, Java, React, and Django**. Built REST API integrations, full-stack web applications, and production-facing features through SDE and integration engineering internships. Strong foundation in object-oriented programming, data structures, and API-driven system design. Eager to grow as a software engineer at Thermo Fisher Scientific and contribute to applications that support scientific research and laboratory systems.

EDUCATION

| Degree       | Specialization                   | Institute                | Year      | CPI  |
|--------------|----------------------------------|--------------------------|-----------|------|
| B.E.         | Information Technology           | MVSR Engineering College | 2021–2025 | 7.42 |
| Intermediate | Physics, Chemistry & Mathematics | Sri Chaitanya College    | 2019–2021 | 9.45 |
| SSC          | —                                | Sri Chaitanya School     | 2019      | 8.8  |

EXPERIENCE

SDE Intern — Samyama.ai | Nov 2025 – Jan 2026

- Developed backend services and model pipelines in **Python** using **FastAPI**-style structured JSON APIs; applied object-oriented design to modularize training, evaluation, and inference workflows.
- Built and fine-tuned a domain-specific Small Language Model using Transformers; generated and validated a **35,506-record** dataset with schema compliance checks.
- Evaluated architecture trade-offs (SLM vs. generic LLM) for latency and cost, demonstrating analytical problem-solving in production-oriented software decisions.

Integration Engineer Intern — CloudSire Solutions LLP | Nov 2023 – May 2024

- Built **REST API** integrations connecting Salesforce, Jira, Mailchimp, ServiceNow, Slack, and Outlook for automated lead routing and ticket creation workflows.
- Automated data extraction, transformation, and import pipelines across enterprise systems; improved conversion and support workflows through API-driven automation.
- Collaborated with stakeholders to translate business requirements into reliable integration logic using **Git**-tracked scripts and iterative delivery.

Front-end Engineer Intern — RCI | 2023

- Developed user-facing web features using **Django, HTML5, CSS, and Bootstrap**; implemented responsive layouts and form-driven workflows.
- Worked with backend templates and client-side components to deliver maintainable, object-oriented web application modules.

Founder's Office Intern — Poditivity Connect | Oct 2024 – Mar 2025

- Coordinated cross-functional teams and supported product initiatives; strengthened written communication through leadership-facing reports and presentations.

PROJECTS

Bridging Learning Gaps: Web App for Deaf and Mute Students in Tamil (Major Project)

- Built a full-stack web application with **Flask** REST endpoints, live video processing, and a CNN-LSTM inference pipeline; achieved **93.7% accuracy** on sign-language recognition.
- Deployed end-to-end with structured data flow between frontend UI, backend services, and ML model components.

MalFoyle: Python-Based Malicious File Detection System

- Developed an automated analysis tool in Python with modular design patterns for hash scanning, Yara rule detection, and structured CLI reporting.

CERTIFICATIONS

- Complete A.I. & Machine Learning and Data Science Bootcamp** — Andrei Neagoie & Daniel Bourke
- 2nd Prize**, Project Expo 2025 — *Bridging Learning Gaps* (RDC & IIC, MVSREC)

TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, SQL, C  
**Web & Frameworks:** React, Django, Flask, FastAPI, HTML5, CSS, Bootstrap  
**APIs & Architecture:** RESTful APIs, microservices-oriented integration design, JSON schema design

**Tools:** Git, Postman, Jupyter Notebook, Celigo, Digibee

**Concepts:** Object-oriented programming, data structures, design patterns (coursework & project application)

**Also familiar with:** Node.js, Agile team workflows, CI/CD concepts (academic/personal projects)
